Introduction

THE amount of references made within the entirety of John Crowley's Ægypt Tetralogy is rather infamous among a certain subset of readers. This is an on-going project to list the real and fictional books that are mentioned therein. So far this is a personal document that combines the bibliographies from other projects made for each book. I did this mostly so I didn't have to search separate files to see if a reference is made.

For that slim minority that cares, I'm doing this in LaTeX, well really it is LuaLaTeX, with BibTeX and multiple keywords. Essentially, I'm setting up filters using DEFBIBFILTER of multiple keywords and then displaying them each as a separate PRINTBIBLIOGRAPHY command.

Any errors within are entirely my own.
