Introduction

THE goal I set for this project is to list all of the books and authors mentioned throughout *Ægypt*, or *The Solitudes*, by chapter. Full bibliographies for both real and fictional works are at the end of the document. If a chapter is missing below, then it did not have any books or authors mentioned within it. Books or authors listed in bold are fictional works created by Crowley. The Authors Mentioned subsections list authors that were mentioned within a chapter but did not mention a particular book, well I tried to keep it that way, but I wasn't always successful.

In most cases I tried to cite a work that would have been appropriate for the time frame of the story in which it is mentioned. In some cases, I have not been able to find a suitable edition and so cite a modern edition instead. Those will eventually be cleaned up to reflect either a copy of the work from the 16th century, one up to 1978, or one available to Crowley while he was writing.¹

This is probably the fourth or fifth version² of this that I've done. The previous versions were for my the enjoyment of myself and a few others. This version I've labored long and hard at to get it as good as possible, which it turns out is another trap that I set for myself. I also made use of BiBTeX using the excellent JABREF application which I originally used in conjunction with TEXMAKER and now with TEXSTUDIO. (*Earlier versions of this were entirely text or Markdown.*)

I'm open to any ideas as to how this can be updated and expanded. For any corrections or comments the reader can email me directly at murfman@pm.me.

Special thanks goes to the guys within the #Books channel on THE MISKATONIC UNIVERSITY PODCAST DISCORD SERVER. You guys know who you are, but I need to mention James (last name withheld) specifically for being a constant font of encouragement.

ÆGYPT BIBLIOGRAPHY is an occasional blog regarding this project is available on SUBSTACK.

(This is now, and likely will remain, a work in progress.)

¹This little rule I decided on early on has caused me no end of grief and will be the death of me I'm sure.

²I've lost count of how many versions of this I have created at this stage, it has been dozens upon dozens.

The Prologue on Earth

JOHN CROWLEY, THE SOLITUDES, THE PROLOGUE ON EARTH

“I’m not from here; I’m from someplace different from this. The road seemed longer than it ever did by day; at the bottom of the hill, the world was still dark, and dawn was far away.”

Authors Mentioned

JOHN CROWLEY, *The Solitudes*, VITA-1

“...his first two practical wishes for health and wealth having been asked and granted, to use his third wish simply to wish that he might forget the whole thing had ever happened; his safety and ease magically assured, to forget he had ever known wishes could be granted, to be returned to his (present) state of ignorance that such irruptions of power into the world, power placed at his unwise disposal, were really truly possible at all.”

Books Mentioned

- *Darkling Plain* — Fellowes Kraft(KRAFT)
- *The Secret Garden* — Frances Hodgson Burnett; Sue Ullstein(BURNETT)
- *The Borrowers Abroad* — Mary Norton(NORTON)⁴
- *Under Saturn, A Novel of Wallenstein* — Fellowes Kraft(KRAFT)⁵
- *Bitten Apples* — Fellowes Kraft(KRAFT)

³The title is listed here as “*Soledades* of Luis Góngora” which is the Spanish name of the poem, but isn’t the name of the version he is reading. Pierce also mentions that this is a “new translation that he was to review for a small quarterly” but I believe this is Crowley adjusting reality to fit the narrative, something that he does throughout.

⁴There is no novel by Norton titled *The Borrowers Abroad*. This may have been deliberate by Crowley, or an accident, since all of the books are named in a similar pattern (i.e., *The Borrowers Afield*, *The Borrowers Afloat*, *The Borrowers Aloft*, *The Borrowers Avenged*). More research could be done to see if this was a proposed title of another book in the series, or if this was a subtle way to shift the book away from the reality, or history in this case, that we experience as the reader.

⁵Seems to be based on the biography of Wallenstein: Watson, Francis. *Wallenstein, Soldier Under Saturn*. 1969.

Chapter 3

The Solitudes of Luis Góngora

THE Solitudes of Luis Góngora, is mentioned in the Author's Note of Crowley's *The Solitudes*, or *Ægypt* as it was originally titled, and is the book that Pierce Moffett is reading when his bus breaks down in the Blackberry Jambs. There are some obvious parallels between the first part of *The Solitudes* and that of Pierce leaving New York City. Góngora's poem centers on a young former knight that has been exiled from the bustling court and all of its intrigue and finds that the pastoral life of the countryside far more enjoyable. And Pierce explains it as such himself...

"You want a beer?" Spofford said, rising.

"Um, sure," Pierce said.

"They're not so cold," Spofford said, bringing him a dusty bottle. "But you're a sophisticate, right? You can drink beer English style."

"Sure," Pierce said. "A sophisticate, definitely."

"What's the book?"

Pierce showed him. "Pastorals," he said. "Poems about sophisticates who leave the city for the country."

"Oh yeah? Interesting."

"About how much nicer it is here than there."

Spofford sipped beer, leaning on the doorjamb. "It is nice," he said. "You should come and stay."

—John Crowley, *Ægypt*, Vita - Chapter Three

Honestly, the plot of the 2,000 line poem isn't much more complicated than that. Understanding it, however, with its constant allegories and metaphors and Latinizations of words makes the original Spanish...tricky. Góngora was born in Cordoba, Spain in 1561 and was one of the leading figures of the Spanish Baroque^a. Góngora left a mark on not just the literature of his time, but literature (especially poetry) ever since that few others can compare to. His style was formalized with a name, *gongorism*, and he has been an inspiration to a varied bunch of artistic movements ever since; from "Generation '27", an attempt to revive the Spanish Baroque style on the 300th anniversary of Góngora's death, to 20th century French Symbolists. He wrote *The Solitudes* in 1613 circulating it anonymously before it was published under his name post-mortem.

The first modern edition of *The Solitudes* was brought out in 1927, the tercentenary of Góngora's death. In *The Solitudes*, a poem of about two thousand lines written in the *silva* meter (seven- and eleven-syllable lines in free pattern), Góngora defies convention and takes as his subject matter the exact opposite of what was expected in Spanish letters in his time. Instead of using the highest level of poetic diction to praise the most heroic and noble of subjects, Góngora employs it to praise the beauties of nature and the virtues of the country and of natural life, while deprecating the artificiality and the vices of the court. The characters who speak with wisdom and live with integrity and nobility are the peasants, not the nobility. It is a paradox of Góngora's art that, while his focus is on the rural and the natural as the authentic and the desirable, he expresses this vision in poetry of the most complex syntax and of allusively and metaphorically dense qualities accessible only to the intellectually trained reader of poetry, and certainly not accessible to the peasants whom he extols. *The Solitudes* describes rustic life in the most ornate diction.^b

In hindsight, it is easy to see Pierce reading a poem known for its complexity that lauds the peasant life and requires some education to understand. It also seems to stand as a direct representation of people trying to understand the *Ægypt* Tetralogy, a seemingly quaint story about a failed professor moving to the country that happens to hide complex Hermetic hermeneutics and cosmology based around a little known, at least in the United States, heretical Italian monk that thought all magick was performed within the infinity of the mind.

The edition of *The Solitudes* that Pierce is likely reading, and the one that Crowley himself definitely was, is *The Solitudes of Luis de Góngora* translated by Gilbert F. Cunningham from The Johns Hopkins Press in 1968. Crowley quotes both the translated English (lines 94-96, 108-111, then 112-116) and original Spanish (113-114 and 119-121) in *Vita* - Chapter Three.

Here is no lust for power,	
No thirst for windy fame;	
No envy, to inflame	110
Like Egypt's aspice race;	
Nor she who, sphinx-like, wears a human face	
above her bestial loins,	<i>acaba en mortal fiera</i>
Whose wily voice enjoins	<i>esfinge bachillera</i>
Narcissus' modern seed	115
To follow Echo, and despite the well;	
Nor she whose insolent salvos now dispel	
The powder treasured be a thriftier breed.	
Propped on his shepherd's crook	<i>ceremonia profana</i>
Rustic simplicity amused may look	<i>que la sinceridad burla</i>
Upon the courtly cheat.	120 <i>sobre el corvo cayado.</i>

Those last three English lines that Crowley quotes make me wonder if this is where Pierce gets the idea that Spofford has a crook. Later, in *Dæmonomania*, Pierce is recalling his arrival in the Jams to Spofford, mentioning that he saw Spofford come over the hill, crook in hand. Spofford resolutely denounces the idea, however, saying he's never owned a crook. This is perhaps another subtle reference to an overarching theme of Pierce's throughout the series, he inability to distinguish what he has read from what is reality. I'm by no means an authority on Góngora or the Spanish Baroque period of literature, so if I've screwed this up, please let me know and I'll correct it. I found my own copy of Cunningham's *The Solitudes of Luis Góngora* for my home library, because one can never have too many books, and I must say that it would be a perfect book for a pastoral bus ride.

^aThe Spanish Baroque period of literature was characterized by a progressive complexity and themes centered on the loss of confidence in the Neoplatonic ideals of the Renaissance. It featured disappointment in the failure of those ideals, an overarching pessimism with the world because of those failures, and a preoccupation with the passage of time. The most famous Spanish Baroque prose writer is Miguel de Cervantes, author of *Don Quixote*.

JOHN CROWLEY, *The Solitudes*, VITA-4

“So let us learn, by all means, why the voices wailed that Pan was dead. Let us learn – the answers are simple enough – why Moses had horns, and why the Israelites worshipped a golden calf; why Jesus was a fish, and why a man with a water-jug on his shoulder directed the Apostles – the Twelve – to an upper room. But let us not think that in such explorations we have disposed of or robbed of significance the story these figures tell. The story remains; if it changes, and it does, it is because our human nature is not fixed; **there is more than one history of the world**. But when we believe that we have proved there is no story, that history is nothing but one damned thing after another, that can only be because we have ceased to recognize ourselves.”

⁷This is the answer that Pierce gives when asked “What’s the book?” I’m almost 100% certain that Pierce is referring to *The Solitudes of Luis Góngora* here, but his answer leaves the possibility that he is reading a different pastoral book of poems. If I had to name something other than Góngora, then it would be *Pastorals* by Ambrose Pierce, 1748, but that is outside the time period for much of the works mentioned. To further solidify the choice of *Pastorals* being Góngora’s *Solitudes* I would refer to the last sentence of Chapter three: “The owl, Athena’s wisdom bird or obscene bird of night (these Gongorisms are catching, he thought), asked again its single question.” I would think referencing the actual style later named for Góngora’s writing would settle the debate...The debate I’m having with myself, that is.

⁸I am assuming the 1939 edition since Pierce mentions bringing several volumes of this fictitious version with him to Blackberry Jams.

⁹Line 6, “iam redit et Virgo, redeunt Saturnia regna,” translated as “The virgin and the reign of Saturn come again.” The following line is, “iam nova progenies caelo demittitur alto,” translated as “now a new child is sent from heaven above.” These lines predicted the coming of Christ, at least to medieval European readers who had just rediscovered Virgil. This is also why Virgil was lauded as such a godly pagan and was the figure that escorted Dante through Hell and Purgatory in *The Divine Comedy*.

How does life cast it up, shape it, exude it; how does Meaning come to have physical, tangible effects, to be felt with a shock, to cause grief or longing, come to be sought for like

¹⁰This book by Lois Rose, and honestly the author Lois Rose more generally, is a bit mysterious to me. I *think* that this is a fictitious book, but this must be the same Lois Rose in the Author’s Note. The problem is that the only Lois Rose that had anything of note, much less “speculations” as mentioned by Crowley, published prior to 1987. The only thing I could find was a book called *The Shattered Ring: Science Fiction and the Quest for Meaning*(ROSE AND ROSE), but how this relates to steganography, I can’t begin to fathom, thus I must be missing something.

¹¹Mentioned by Crowley as “Old Mother Westwind.”

¹²I’m assuming this is a real unnamed history book belonging to Miss Martha, Pierce’s uncle Sam’s housekeeper.

¹⁷This could quite possibly be Mary Norton, but as it is just a last name mentioned I didn't want to assume.

¹⁸Her book, while not mentioned by name, is *A Cooperative Method of Natural Birth Control* (**Nozfinger**1976). I'm less sure of this one as Crowley mentions them only by last name and I can only find this author who might be on a shelf near *Phaeton's Car*.

²⁰Mentioned by Crowley simply as "Costain"

²¹Title given in *Ægypt* is *Our Sunday Missal* which could have been a mis-remembering on Crowley's part, or another slight alteration. This is the closest thing I can see Pierce having on his shelf.

²²While the four volumes are not mentioned by name, we can guess candidates among Thorndike's works since they're listed as "secondary sources" for Pierce's novel (e.g., *The Place of Magic in the Intellectual History of Europe*, *The History of Medieval Europe*, any four of the eight *History of Magic and Experimental Science*, *Check-list of Rotographs in the History of Natural and Occult Sciences*, *The Sphere of Sacrobosco and its Commentators*, etc.).

²⁶EB moved to a continually revised model in 1933. Crowley mentions “several volumes of the 1939 edition,” but there was no discrete “1939 edition”; it would have been reprints of the 14th (1933) revised.

²⁷The Douay–Rheims Bible is a translation from the Latin Vulgate completed by the English College, Douai in 1582 and 1609.
